

Exhausting-System VP 3

Perfect vacuum suction system for the workshop

High capacity – robust – reliable

Maximum performance at a minimum price

Made for watchmakers, goldsmiths, engravers, opticians and dental laboratories.

For taking off dirt particles and glass splinters from dials, watchcases as well as from other working areas.

With this exhausting performance you reach a max. cleanness at your working place.

Characteristics:

- High Suction
- Oilless operation
- Long service-free life
- Compact
- Low noise

Technical Datas:

Voltage:	230V~ +/- 10%	50/60
Hz		
Nominal speed:	1400/1700 rpm	
Power:	0,18 kW	
Current consumption:	1,6/1,4 A	
Protection:	IP 54	
Overlead-switch:	yes	
Max. volume flow:	3,2/4,0 m ³ /h	
End vacuum:	150 mbar absolut	
Max. vacuum continuous operation:	250 mbar absolut	
Working temperature:	0 bis 50°C	
Medium sound level:	55/57 db (A)	
Weight:	5,8 kg	

The standard-system (1 person) consists of:

Vacuum pump, filter, footpedal connected,

3 m pipe, handpiece with brush and holder.
